World Water Day 2018

Too much water, too little water, too poor water quality – this is the situation in many developing countries. How can we reduce floods, droughts and water pollution?

Engineers Without Borders Denmark (EWB-DK) in cooperation with Ramboll celebrates the UN World Water Day with an event, where all interested are welcome.
Join and hear about completed and ongoing projects related to

- Extreme weather disasters
- Remedial actions
- Preventive climate change adaption actions
- Innovation for novel analytical methods for pathogens in water

Presentations will be given with examples from West African countries and will be followed by a panel discussion.

Time: Thursday March 22nd at 5-7:30 pm. From 5 to 5:30 pm there will be arrival and registration.
Place: Rambøll Head Office, Hannemanns Allé 53, 2300 Copenhagen S
