Climate hazards

- Flooding
- Drought
- Landslides
- Melting glaciers (don't know if it affects the area)
- Slow onset changes in weather patterns due to climate change

Vulnerabilities

- Vulnerable groups: handicapped, elderly people, women, low caste and children
- Dependency on subsistence farming
- Reduced mobility/ access to the remote areas
- Poorly designed and constructed houses
- Reduced access to markets
- Reduced access to medical facilities
- Crops
- Water ressources affected by flodding and changing weather patterns
- Reduced access to aid/resources

Impact

- Malnutrition/ hunger
- Loss of crops
- Loss of houses
- Loss of lives, livestock and infrastructure to flooding
- Loss of income for farmers
- No medical treatment when access to hospitals is reduced
- Isolation: aid/projects/people does not reach the remote areas
- Replacement/ rehabiltation
- Polluted water ressourses

Landslides
Flooding
Drought
Slow onset changes in weather patterns due to climate change
Melting glaciers (don't know if it affects the area)
Especially vulnerable groups: handicapped, elderly people, women, low caste and children
Dependency on subsistence farming
Reduced mobility/ access to the remote areas
Reduced access to markets
Crops in the fields
Poorly designed and constructed houses
Reduced access to medical facilities
Reduced access to aid/resources
Water ressources
No medical treatment when access to hospitals is reduced
Isolation: aid/projects/people does not reach the remote areas
Polluted water ressourses
Replacement/rehabilitation
Loss of lives, livestock and infrastructure to flooding
Loss of crops
Malnutrition / hunger
Loss of income for farmers
Loss of houses

Things we discussed but did not include

Social capital

Caste system and ethnic groups

Migration

The effects on and of remittance on vulnerabilities

Knowledge gap/loss from the rural areas

loss of job opportunities for the youth
