

Assessment of health and safety provisions work and accommodation

Indicators to be applied for assessment of accommodation, safe and healthy working and living conditions:

- Diseases prevalent in the area (water-, mosquito-, human-borne, seasonal, etc.), including the level of likelihood and impacts
- Availability and accessibility of first-aid support (internally and externally), fire wardens and services, medical facilities and professionals (e.g. hospitals, nurses, access to medication) to be assured
- The level of maintenance for all locations (offices and accommodation); availability of electricity points, lighting, ventilation, sanitation and hygiene facilities to be assured
- The level of vehicle maintenance, regular inspection and servicing, appropriate equipment (such as radio, first-aid kit, seat belts, water, blanket)
- Availability and quality of desk space, chairs, computer equipment
- Working hours, work safety procedures, provisions for leave and degree of remoteness, access to markets, etc.
- Health-and-safety incident reporting mechanisms and monitoring
